The National Archives

Management Board Briefings

As part of our commitment to promote good information management practice within government, The National Archives are pleased to offer bespoke board briefings to ministerial departments and their arms length bodies.

What do we offer?

Our speakers all have extensive experience in senior management and engaging organisations in information security. They will provide a 20-45 minute briefing during the normal programme of board and audit committee meetings. The briefing provides an overview of IA and cyber security threats at a strategic level, followed by a discussion on effective ways to manage these risks. Each briefing is tailored to suit the specific needs of the organisation and highlight issues of interest to the board

Expert Speakers	The Board as Cultural Champions	Wider TNA Support
Our speakers include experienced NEDs, ex-SIROs, audit committee chairs and other senior level individuals. They have all worked extensively within government to help organisations manage their IA and cyber risks. With the help of your TNA Information Management Consultant we will select the speaker who best suits the culture and challenges faced by your organisation.	All our briefings are tailored to the interests of the board. Topics often covered include: **Understanding the threats** ♦ Threat actors ♦ Tactics used **Deciding what matters** ♦ Identifying key assets ♦ Setting a risk appetite **Taking action** ♦ Developing policy and strategy ♦ Encouraging a culture of security	The management board programme is offered alongside TNA's ongoing IMA and IMC programmes. We also provide training and eLearning for Information Asset Owners and front line staff. The board briefings form part of this wider engagement, they ensure a consistent message and emphasis on managing risk is in place across all levels of the organisation.
