

## **Summary of meeting**

### **Self-assessment advisory panel**

**24 January 2008**

The Panel met to consider appeals by six authorities and new evidence from each was reviewed. In addition, the key messages emerging from the body of data collected by self-assessment in 2007 were discussed and a number identified for dissemination with the results. The Panel agreed that feedback should be sought on the impact of self-assessment and the use made of it by archive services with specific reference to this in the 2008 questionnaire. The Panel also decided that the focus of the 2008 questionnaire should be the first two sections: governance and resources, and documentation of collections.
