### HOW TO USE THIS SOURCE TO HELP YOU ANSWER THE BIG QUESTION :

Study this source carefully and consider what it tells you about why people thought women should get the vote. You should consider:

#### ASK YOURSELF:

- What do the advertisements suggest are the kinds of books, talks and products which will interest women?
- What are the aims of the journal *Women and Progress*?
- What reforms and measures does the paper want to see the government take?
- Why do you think the journal lists Suffrage as more important than the other aims?

### WOMEN AND PROGRESS.

Our objects are as before—to deal with economic and political topics as affecting women, to afford a medium for the expression of women's views, and to show by publication of these views, and by recording women's work in this and other countries, that women are fitted for the responsibilities which they claim. At the goal of our progress lie many reforms. The Suffrage for women claims the chief place; after that, reforms in housing, public health, education, temperance, sanitation, labour, prison life—indeed the list of necessary reforms is too long to quote in full, and will lengthen as time goes on. By progress towards this goal we do not mean a rush so rapid as to cause injury by the way, a reckless haste that would lose itself in supposed short cuts, or take the wrong road rather than give time for consideration, but a thoughtful, well-planned, and temperate advance.
