HM Treasury – Government Financial Reporting
Pop quiz

Q1: When is the updated FReM issued?
A) December of each year  B) February of each year

Q2: What did Rahul create for his first signature bake in the 2018 bake off?
A) Chocolate Orange Layer cake  B) 3D biscuit bake of ‘First Spring in the UK’

Q3: What recent International Financial Reporting Standard will now be implemented in the UK public sector in 2020/21, instead of 2019/20 as originally planned?
A) IFRS 16  B) IFRS 17
Who we are:

Government Financial Reporting (GFR) team in HM Treasury

• We update and issue the Financial Reporting Manual (FReM) on an annual basis. The FReM provides guidance on reporting and specifies any adaptations and interpretations to IFRS for the public sector.

• Through this we fulfill HM Treasury’s statutory role as the public sector accounting standard setter, steered by the independent Financial Reporting Advisory Board (FRAB).
Who we are:

Government Financial Reporting (GFR) team in HM Treasury

• Our range of work is not limited to our statutory remit:
  
  • We account manage departments, providing them with technical advice when needed.
  
  • We are also currently working on specific budgeting and capacity building projects.
  
  • Our wider team works on Estimates, classifications and Whole of Government Accounts.
What we do: new standard implementation

• The implementation of new standards in the public sector is a lengthy process. The implementation of IFRS 9 and IFRS 15 had lead times of four years each.

• We actively engage departments to ensure that their views are heard. For example, for IFRS 16 we have set up a Technical Working Group, made up of representatives from departments, which has had a significant input into the project and we have fed specific queries into RASIG.

• We work closely with the FRAB, an independent body that provides oversight and advice on the implementation of new standards.

• We adapt and interpret standards for the public sector to help departments apply them, while ensuring the usability and relevance of accounts is not diminished.

Updates – Discount rates

• HMT issues discount rates in December of each year, for departments to apply to provisions.

• The rates issued historically have been **REAL RATES** (which take account of inflation). Due to low BOE interest, these rates have been negative in recent years.

• HMT initiated a project in late 2016 to assess whether the type of rates issued should be changed, to a) avoid the issuance of negative rates and b) to better align with best practice. As a part of this project, we have consulted extensively with departments.

• From December 18, HMT will issue **NOMINAL RATES** (which do not take account of inflation).

• Where nominal rates are applied, provisions should be separately adjusted for inflation.

• Full guidance and the PES paper containing discount rates for 18/19 can be found on OneFinance.
Updates – Controls guidance

- HMT sent out new **CONTROL FRAMEWORK GUIDANCE** to departments just before Christmas.

- HMT have noted that there has been increasing approaches by departments requesting authority to change control limits. This was also noted by the C&AG in his letter on the 16/17 annual reports and accounts cycle.

- This document contains no new information and does not change any of the financial controls.

- It is a consolidated document of control information to help departments and sets out:
  - What the controls are;
  - The control limits;
  - The relevant guidance that refers to the control;
  - The penalty for breaching the control; and
  - The authorisation procedure if the control is breached.
Updates – Further updates

- The updated Consolidated Budgeting Guidance is due to be published early in 2019.

- Technical Accounting Centre of Excellence (TACoE) launched 25th July 2018. Cabinet Office is also creating a Debt Centre of Excellence, currently in preparation.

- We are likely to issue guidance on any disclosures required in relation to Brexit nearer year end.

- The 16/17 WGA was published in June and is available online. It is a superb resource, enabling the easy comparison of departmental spending, summarising the financial position of the public sector and analysing financial performance: https://www.gov.uk/government/collections/whole-of-government-accounts
2014 *Simplifying and Streamlining*

2017 *Accounting for Democracy*
- Public Administration and Constitutional Affairs Committee (PACAC) make recommendations for reporting

GFR review – why do we care?

Accountability

Transparency

Trust in a climate of ‘fake news’
