Darren  
See response from DCMS GDPR Helpline on the frameworks. As we surmised, it’s apparently our responsibility. Could you check that I go the questions right and thus the answers make sense? Thanks  
Linda

Subject: Re: Framework contracts  

Hello Linda  

In answer to both questions.
The CCS frameworks provide a guidance, but not necessarily meet the needs or expectation of particular contracts. In every case each department / ALB must ensure appropriately trained staff review a contract to ensure it is compliant.

Happy to discuss

Best regards

Hello,

2 questions from our procurement team (who really liked the CCS PPN).

1 With existing call-off contracts from the CCS frameworks, are CCS dealing with the new arrangements for GDPR, or should departments include framework contracts in their own GDPR exercise?

2 Can departments assume that any new call off contracts from the frameworks post May will have been updated by CCS to be GDPR compliant?

Many Thanks

Linda
