JENNER MUSEUM
Berkeley

Archives

The Jenner Museum collects, preserves, interprets and makes available for study material (including archives) on the following subjects:

- Edward Jenner (1749-1823), his work on smallpox, the cuckoo, hedgehog, and as a country doctor.
- The development of smallpox vaccination and its impact on society in the 18th, 19th and 20th centuries, in Britain and abroad.
- The Global Smallpox Eradication Campaign masterminded by the World Health Organization between 1957 and 1979.
- The development of the science of immunology since Jenner's pioneering work. Very few artefacts or documents held come into this category. The museum's treatment of the subject is through a major permanent exhibition "*Immunology Works*".

There follows an alphabetical list of the kind of material held and the places that are represented in the collection.

Queries regarding the archives should be addressed to :

The Museum Manager,
The Jenner Museum,
Berkeley,
Gloucestershire.
GL13 9BH
Tel : 01453 810631
Fax : 01453 811690

Visitors are welcome by prior appointment.
